EDUCATION

G.I Bajaj Institute of technology and management
Bachelor of Technology in Electronics and Communication Engineering
• CGPA: 7.56

Greater Noida
Dec 2023 – Present

Navy Children School
Senior Secondary School
• Percentage: 78.6

New Delhi
April 2023

EXPERIENCE

Software Developer Intern
SlashByte

January 2026 – March 2026
Remote

- Revamped landing page with responsive **HTML/CSS** design and custom React components, reducing by **load time 30%** and improving engagement metrics.
- Implemented JavaScript-based **A/B testing** framework and integrated **React hooks** for dynamic UX features, feeding insights into data-driven UI refinements.

PROJECTS

Medical Summarizer | *React.js, Node.js, Express.js, MongoDB, Gemini API*

Jan 2026 – Jan 2026

- Engineered a full-stack platform that converts doctor-patient conversations into structured, patient-friendly medical reports using **Gemini API** - eliminating manual transcription for clinics.
- Designed and implemented a RESTful Node.js/Express API in TypeScript following SOLID principles alongside a responsive React.js frontend styled with Tailwind CSS and also integrated Gemini API for automated NLP summarization, **reducing report generation time by 70%**
- Containerized backend and frontend services with Docker and set up a **CI/CD pipeline** on **AWS CodeDeploy** using GitHub Actions, incorporating health checks and **CloudWatch** monitoring to ensure reliability and quick rollback

Smart Classroom Monitor | *Github, React.js, Node.js MongoDB, supabase , Esp32*

March 2025 – April 2025

- Built a **real-time IoT monitoring system** using ESP32 sensors and implemented an **event-driven queue** to process structured JSON data via Supabase Realtime API **every 5 seconds**, optimizing throughput under version control with Git
- **Secured ESP32-to-cloud** data via **JWT authentication** and delivered a real-time React/TypeScript dashboard with GSAP animations that reduced physical checks by **80%**.

Solo Leveling System | *React.js, TailwindCSS, Express.js, MongoDB*

April 2025 – July 2025

- Developed and deployed a full-stack Solo Leveling-inspired habit tracking application using React, Node.js, Express, and MongoDB, enabling users to build habits through **XP-based progression**, leveling mechanics, and unlockable rewards.
- Engineered a LeetCode-style activity heatmap, streak tracking system, and inventory rewards alongside optimized RESTful APIs for experience calculation and seamless state updates, deploying the full-stack system on Render.

ACHIEVEMENTS

Leetcode: Solved **400+** problems and achieved a position among the **Top 15%** of LeetCode Users.

Member of Coding Club: Part of a college Coding Club where I mentored 25 Juniors.

Hack LLM - National Level Hackathon : Led team to a Top 10 finish out of 300+ teams as Team Leader.

TECHNICAL SKILLS

Languages: C, C++, JavaScript, Python

Devops tools: AWS, Jenkins, Docker

Web Development: HTML, CSS, TailwindCSS, React.js, Node.js, Express.js, MySQL, Redis, MongoDB

CS fundamentals: OOPS, DBMS, Operating System , Computer Networks

Other Tools: Git, GitHub, Linux, Render, Jira
